***Election/Restrictions***

Applicant's election with traverse of Group IV in the reply filed on 3/06/07 is acknowledged. The traversal is on the ground(s) that to search all the compounds in the various groups would not be a burden because they all require only "one field of search", which applicant did not explain the meaning of. This is not found persuasive because this is not correct, in fact, to search for all these different set of compounds with a variable core wherein said core is not novel is voluminous and require different searches based on structure and hence presents an undue burden on the examiner to search all these compounds in a single application.

The requirement is still deemed proper and is therefore made FINAL.

The claims were examined solely to the extent in which they read on the elected subject matter.

*The non-elected subject matter of claims 25 and 27-31 are cancelled by examiner's amendment.*
